# Fully Auto Three Colors Foam Injection & Shaping Machine

This model is produced by our several year's experience and first developed successfully with multi-function for multi-purpose on the shoes-making machine. It is most suitable for plasticizing plastic material PVC, TPR, TPU and specialized to produce for single color, two color, three color foaming or non-foaming, etc. various shoes.

## FEATURES:

- This machine equips with injection pressure regular at each station. Ensure can meet different type mould, products high quality request.
- Injection part: constructed by two injections, screw rod running directly driven by hydraulic motor.
- On-off die hydraulic cylinder adopts of special design of mother son cylinder design featured with high-speed low-pressure die closing and low-speed high-pressure die clamping.
- Round disc adopts of hydraulic motor driving, and is featured with high speed running, low speed stop.
- Pressure adopts of single-adjusting to increase the stability, safety, and easy to operate.
- Computerized accurate P.L.C control system, easy for operation and machine maintenance.
